

ALEX MYRHORODSKYI

Junior Frontend Developer

Kristiansund, Norway | alex.myrhorodskyi@gmail.com
github.com/sanderalex1 | [LinkedIn](#)

LANGUAGES

Ukrainian (Native) **English** (Professional Working Proficiency) **Norwegian** (Elementary / Learning)

PROFESSIONAL SUMMARY

Junior Frontend Developer with hands-on experience building scalable web applications using React, TypeScript, and modern UI frameworks. Unique background combining software development with 2+ years of logistics industry expertise as a Broker/Manager, bringing strong communication skills, CRM proficiency, and business domain knowledge. Actively leverages AI-powered development workflows (Claude Code, NotebookLM, Lovable, MCP integrations) to accelerate prototyping and delivery. Currently co-developing an AI-enhanced SaaS language-learning platform. Passionate about clean code, responsive design, and continuous learning.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks	React, Node.js, Express.js, Vite
State Mgmt	Redux Toolkit, React Hooks (useState, useReducer, useContext)
Styling	Tailwind CSS, Material UI (MUI), Responsive Design, CSS Modules
APIs	RESTful API integration, Fetch API, Axios, JSON
Tools	Git, GitHub, VS Code, npm, ESLint, Chrome DevTools
AI Workflows	Claude Code, Claude Cowork, NotebookLM, Lovable, MCP (Figma, Playwright), AI Agent Skills
Other	CRM Systems, Agile methodology, Cross-functional collaboration

WORK EXPERIENCE

Freelance Frontend Developer | Self-Employed | RemoteJan 2026 – Present

- Deliver frontend solutions for clients including REST API integrations, UI bug fixes, and responsive landing pages
- Build pixel-perfect layouts from design specifications using React, Tailwind CSS, and modern component architecture
- Leverage AI-augmented workflows (Claude Code, Lovable) to accelerate prototyping and reduce delivery timelines
- Collaborate with clients to scope requirements, iterate on feedback, and ship production-ready code via Git

Broker / Manager | SelectLogistics | United States (Remote)Jul 2023 – Sep 2025

- Managed end-to-end freight brokerage operations, coordinating between shippers and carriers to ensure timely delivery across the US
- Utilized custom CRM platform for lead management, shipment tracking, rate negotiation, and client relationship management
- Developed strong communication and negotiation skills by managing carrier and client relationships in a fast-paced logistics environment
- Built deep understanding of supply chain operations, pricing models, and logistics technology — enabling domain-informed software development

PROJECTS

AI Language Learning Platform — *React, Node.js, Express, REST API*

- Co-developing a SaaS platform that leverages AI to generate flashcards for spaced repetition and active recall, helping users learn new languages more efficiently. Responsible for the full frontend architecture, component design, and API integration. Currently in active development with a partner.

JobTracker — AI-Enhanced Job Search Platform — *React, JavaScript, AI Integration*

- Built a personal AI-powered tool that aggregates job listings from multiple sources, analyzes role requirements against personal experience, and applies intelligent flags to help evaluate position fit. Streamlines the job search workflow with automated tracking and filtering.

EDUCATION

Kodehode — Frontend Development BootcampNorway

- Intensive program covering JavaScript, TypeScript, React, Node.js, Git, responsive design, and agile development practices

State University of Economics and Technology

Sep 2019 – Jun 2023

Bachelor of Arts — International Relations, Social Communication & Regional Studies

- Relevant coursework: English Language, Corporate Communications
